CAREER OBJECTIVE

Computer Science student at Mariano Marcos State University (2023–present) with practical experience in frontend web development using React, Next.js, JavaScript, HTML, and CSS. Currently seeking an on-the-job training opportunity to further develop skills and contribute to building accessible, user-friendly web applications.

TECHNICAL SKILLS

Languages & Markup: HTML, CSS, JavaScript, Python, SQL
Frameworks & Libraries: React, Next.js, TailwindCSS
Tools & Platforms: Git, GitHub, MySQL, Godot, Vercel, UI/UX Design
Languages: English (professional), Filipino/Tagalog (native), Iloko (native)

PROJECT EXPERIENCE

TrackWeave: Connecting Songs in Artist Discographies Using Graph-Based NLP Analysis 2026
Web Project / HTML, CSS, JavaScript, NLP, Graph Algorithms In Progress

- Developing a graph-based NLP system that maps thematic and stylistic connections between songs within an artist's discography.
- Implements natural language processing to extract lyrical features and visualize how an artist's themes evolve across albums.

Lam-Ang Chronicles
Game Project / Godot, GDScript, Game Design 2025

- Built a playable narrative-driven 2D RPG in Godot Engine inspired by the Philippine epic Lam-Ang.
- Implemented a custom dialogue system, character state management, and turn-based combat mechanics from scratch.

Ilocos Norte Accessibility Finder 2025
Web Project / HTML, CSS, Python, Perl

- Developed a web application helping users with mobility or sensory concerns locate accessible venues across Ilocos Norte.

Truth Table Generator 2024
Python Project / Python

- A Python project that automates truth tables by hardcoding logic without external libraries

Pawfection Palace
Web Project / HTML, CSS, JavaScript 2024

- Built an online grooming appointment booking platform for pet owners with a separate admin dashboard for staff scheduling.
